My Mission: Specializing in high-end kitchen and bath renovation and new construction, my goal is to bring my client's vision to life using my design expertise and creating "theme-designed" spaces that match my client's lifestyle.

Tools of the Trade: Hand-drawn visuals on my drawing board, a 20/20 3D visualization computer program, updated color blocks and door styles from Plain & Fancy cabinetry.

One Thing I've learned the hard way: Get a design retainer before releasing drawings.

I Serve: I am vice president of academic affairs and vice president of government relations for the GA/SC Coastal Chapter of the National Kitchen & Bath Association. In my government relations role, I am involved with title acts and practice acts before various states. Being both a Registered Interior Designer and a Certified Kitchen and Bath Designer, I am in a unique position to give fair representation to both groups. I'm also collaborating with Patricia Walton through her Studio II Interior Design Class at Georgia Southern University to implement the NKBA Student Kitchen Design Contest and hosting internships for students from this program.
